T O T A L   P R I C E   G A P

£106,000

Price premium: £82,000 | Condition discount: £85,000

S E L L   A S - I S

£1,172,950

Net proceeds after fees

R E N O V A T E   T H E N   S E L L

£1,197,300

Net proceeds after fees and works

### What This Means

The market is willing; the price is the obstacle. On the evidence, the property is positioned around nine per cent above where comparable homes have sold, and its condition is compounding the gap by giving viewers reasons to discount further. Closing both — a realistic asking price and a targeted programme of works — converts a stalled listing into a competitive one.

## MARKET POSITION ANALYSIS

42 Thornfield Rise, Blackheath, London SE3 8ZZ

### Your Price vs The Market

|                                   |            |
|-----------------------------------|------------|
| Your Asking Price                 | £1,295,000 |
| Original Asking Price             | £1,350,000 |
| Your Price Per m <sup>2</sup>     | £8,931     |
| Street Average Per m <sup>2</sup> | £8,200     |
| Price Variance                    | 8.9% above |
| Market Position Grade             | C          |

## Time On Market

|                             |    |
|-----------------------------|----|
| Weeks Listed                | 14 |
| Total Viewings              | 11 |
| Offers Received             | 1  |
| Average Days to Sell (area) | 52 |

## What The Data Says

Eight comparable sales on and around Thornfield Rise over the past twelve months range from £985,000 to £1,420,000, with a median of £1,180,000. Adjusted for size, the local rate sits at £8,200 per square metre. Your asking price implies £8,931, placing it in the upper quartile of recent evidence without the floor area or condition to justify the premium. The wider Blackheath market has absorbed forty-seven sales in the period at an average of £1,150,000, confirming demand at the right level.

## VISUAL CONDITION ASSESSMENT

### 42 Thornfield Rise, Blackheath, London SE3 8ZZ

This assessment analyses photographs provided by the seller to identify visible conditions that a buyer's survey would flag. It is a cost intelligence tool, not a building survey.

|                          |         |
|--------------------------|---------|
| Overall Condition        | Fair    |
| Confidence               | Medium  |
| Estimated Condition Cost | £52,000 |
| Buyer Discount (x1.3)    | £85,000 |

### Element Assessment

| Element    | Grade | Finding                              | Cost Impact |
|------------|-------|--------------------------------------|-------------|
| Kitchen    | C     | Original units, functional but dated | £18,000     |
| Bathrooms  | C     | Worn suites, dated tiling            | £12,000     |
| Windows    | C     | Mixed; rear single-glazed            | £8,500      |
| Decoration | D     | Tired throughout                     | £9,500      |
| Heating    | C     | Ageing boiler nearing end of life    | £3,500      |

### Defects Identified

| Location       | Defect                             | Severity | Cost Est. |
|----------------|------------------------------------|----------|-----------|
| Ground floor   | Dated kitchen, original units      | Cosmetic | £18,000   |
| First floor    | Worn bathroom suites, dated tiling | Cosmetic | £12,000   |
| Rear elevation | Single-glazed windows to rear      | Moderate | £8,500    |
| Throughout     | Tired decoration throughout        | Cosmetic | £9,500    |
| Utility        | Ageing gas boiler (15+ years)      | Moderate | £3,500    |

### What A Buyer Will See

Viewers price what they see. The kitchen and bathrooms are functional but visibly dated, the decoration is tired throughout, and the rear elevation retains single glazing. Individually minor, together they signal a property requiring work, and buyers typically discount that prospect by more than the works actually cost. We estimate the current condition is suppressing perceived value by around £85,000 — materially more than the £52,000 required to address it.

Visual assessment based on photographs provided. Not a building survey. Refer to Part D standard statements.

## DETAILED REMEDIAL COST SCHEDULE

### 42 Thornfield Rise, Blackheath, London SE3 8ZZ

The following costs represent the work required to address the condition issues identified in the Visual Condition Assessment. These are the items a buyer's survey would flag and a buyer will deduct from their offer.

| Item                   | Qty                | Rate    | Total   | Priority |
|------------------------|--------------------|---------|---------|----------|
| Kitchen replacement    | 1                  | £18,000 | £18,000 | High     |
| Bathroom refurbishment | 2                  | £6,000  | £12,000 | High     |
| Full redecoration      | 145 m <sup>2</sup> | £66     | £9,500  | Medium   |
| Rear glazing upgrade   | 6                  | £1,417  | £8,500  | Medium   |
| New gas boiler         | 1                  | £3,500  | £3,500  | Low      |

|                         |         |
|-------------------------|---------|
| Subtotal Remedial Works | £51,500 |
| Contingency (10%)       | £5,150  |
| Total Remedial Cost     | £56,650 |
| Buyer Discount (x1.3)   | £85,000 |

### Cost Context

The figures below are benchmarked against current Greater London rates and assume a competent contractor working to a defined scope. They cover the priority items only; a fuller refurbishment would cost more and is not required to achieve the uplift modelled here.

Costs from the BuildLens cost database, continuously updated from live UK trade and merchant pricing. Regional multiplier: 1.18.

## RENOVATION ROI ANALYSIS

### 42 Thornfield Rise, Blackheath, London SE3 8ZZ

Should you invest in remedial works before resale, or sell as-is and adjust the price?

#### Scenario A: Sell As-Is

|                         |            |
|-------------------------|------------|
| Realistic Selling Price | £1,189,000 |
| Less: Agent Fees        | £14,250    |
| Less: Legal Costs       | £1,800     |
| Net Proceeds            | £1,172,950 |

#### Scenario B: Renovate Then Sell

|                       |            |
|-----------------------|------------|
| Renovated Value       | £1,271,000 |
| Less: Renovation Cost | £56,650    |
| Less: Agent Fees      | £15,250    |
| Less: Legal Costs     | £1,800     |
| Net Proceeds          | £1,197,300 |

RENOVATION RETURN

43%

*Selling as-is nets an estimated £1,172,950. Completing the priority works at £56,650 all-in and selling the improved property nets £1,197,300 — a gain of £24,350, or a return of roughly forty-three per cent on the money spent, before accounting for a likely faster sale. The case is positive but not outsized; it rests on disciplined spending against the schedule.*

Our Recommendation

*On these numbers, a focused renovation followed by sale is the stronger outcome: a higher net figure, a shorter time on the market, and a property that competes on presentation rather than on price alone. The margin is real but modest, so the recommendation holds only if the works are kept to the priority schedule. Spending beyond it erodes the return.*

## PRIORITY FIX LIST

### 42 Thornfield Rise, Blackheath, London SE3 8ZZ

Fix these items before your next viewing. Listed in order of impact on buyer perception and offer price.

| Priority | Item                   | Cost    | Impact   |
|----------|------------------------|---------|----------|
| High     | Kitchen replacement    | £18,000 | +£32,000 |
| High     | Bathroom refurbishment | £12,000 | +£20,000 |
| Medium   | Full redecoration      | £9,500  | +£15,000 |
| Medium   | Rear glazing upgrade   | £8,500  | +£10,000 |
| Low      | New gas boiler         | £3,500  | +£5,000  |

|                         |          |
|-------------------------|----------|
| Total Fix Cost          | £51,500  |
| Expected Value Increase | £82,000  |
| Net Gain                | +£30,500 |

### How To Use This List

The works below are ordered by return, not by cost. The kitchen and bathrooms carry the heaviest influence on first impressions and should lead; decoration and the rear glazing follow. None of this is structural — the property is sound — but presentation is doing measurable damage to your position, and the sequence matters as much as the spend.

THE EVIDENCE

42 Thornfield Rise, Blackheath, London SE3 8ZZ

Flood Risk Assessment

| Risk Type              | Risk Level | Status |
|------------------------|------------|--------|
| River & Sea Flooding   | Very Low   | GREEN  |
| Surface Water Flooding | Low        | GREEN  |

## What This Means

Flood risk affects insurance premiums, mortgage availability, and property value. Lenders require flood risk assessments for properties in medium or high-risk zones.

|                |                                                                                                |
|----------------|------------------------------------------------------------------------------------------------|
| Very Low / Low | Standard insurance available. No additional flood surveys typically required by lenders.       |
| Medium         | Insurance may carry flood excess. Some lenders require a Flood Risk Assessment.                |
| High           | Specialist flood insurance likely required. Most lenders require a full Flood Risk Assessment. |

# METHODOLOGY & DISCLAIMER

## Data Sources

Market data derived from HM Land Registry Price Paid Data and Energy Performance Certificate Register (MHCLG). Condition costs are drawn from the BuildLens cost database, continuously updated from live UK trade and merchant pricing.

Regional adjustment applied using established regional cost variation factors. Property location (Greater London) carries a multiplier of 1.18against the UK average.

Visual Condition Assessment based on photographs provided. Not a building survey. Cannot detect defects within or behind building fabric, those requiring physical inspection, or issues detectable only with specialist equipment.

## Limitations

This report provides market intelligence and is not a professional valuation, building survey, or structural assessment. The market position analysis compares your asking price against comparable sales data and does not constitute a formal valuation.

Costs are indicative and based on market conditions at date of issue. Actual contractor quotations may vary. The renovation ROI analysis uses current comparable data and cannot predict future market movements.

BuildLens AI Ltd accepts no liability for decisions made based on this report. Professional advice should be sought for significant financial commitments.
